Examiner's Statement of Reasons for Allowance

Claims 2-6, 9-12, 15-18, and 21-24 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to a system, method, and a stored computer readable medium for path searching a stable path. In particular, applicant monitors a change in a power level of a sample of two or more delay profiles and assigns a weight to a power level of a specified sample. This weighting assignment depends upon a number of samples of a candidate. The benefit of the weighting assignment that is not taught by the prior art is that when the number of samples of the candidate is 1, then a negative weight is assigned to a power level of the sample. Therefore, applicant has found a procedure for determining a threshold value to detect a high power level.

Applicant's independent claims each recite, *inter alia*, a weighting controlling section, when the number of samples of said candidate for said weighting control is 1 (one), assigns negative weight to a power level of the sample, the negative weight being a weighting value less than 0 (zero). Applicant's independent claims comprise a particular combination of elements, which is neither taught nor suggested by the prior art. Miya teaches a path-searcher derives the current power delay profile. The delay powers received during the current path-searcher activation are first selected with the largest powers. Each selected power is ranked and given a ranking weight. Moreover, the contribution of delay number is added to the power delay profile discrepancy variable B (paragraph 71). Jonsson discloses selecting two weighting factors of path A and path B when both have equivalent levels of power. However, Miya, Jonsson, the cited

references, and a thorough search fail to teach the assignments of negative weights to a power level of the sample.

Accordingly, applicant's invention is allowed for these reasons and the reasons recited by applicant in the amendments, arguments, and the pre-appeal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
